

Grinding Technology: A Focus Seminar "Power Tools" 2021

Invitation

Hand-held tools and power tools are mobile, flexible, fast and powerful. Whether in use as an all-rounder or specialist tool: In the new VSM Focus Seminar, our abrasives experts cover all applications.

Which tools are available on the market or are used in the factories and workshops? Which tool do you choose for which task? What tips and tricks are there for handling the tools and how can the advantages of the various tools be combined? How do you identify possible sources of error and counteract them?

These and many other questions will be answered in the two-day seminar. The seminar is rounded off with a comprehensive practical section with useful tips and tricks.

After the seminar ...

- ... you will be unerring in your choice of power tools and corresponding abrasives.
- ... you will be able to fully exploit the optimisation potential – also by selecting suitable accessories, such as harder backing pads.
- ... you will have detailed expertise in applications.
- ... you can apply your newly acquired knowledge in your company with confidence.

Venue

VSM AG · Technical Center
Siegmundstraße 17 · 30165 Hanover
